

Philosophy 217 : Bioethics

This course introduces students to a selection of current debates in bioethics, including topics such as artificial reproductive technology, abortion, health care resource allocation, disability accommodation, genetic testing, end-of-life care, physician-assisted suicide, and clinical research. In the context of discussing these issues, we will consider various ethical theories, including theories that emphasize the primacy of character, rights, consequences, and care for others. The class will be discussion focused with an emphasis on philosophical argumentation and writing.
