

Physics 155 : General Physics I

This course focuses on classical mechanics: kinematics, Newton's laws of motion, energy and momentum conservation, and waves. Students enrolling in this course also will be required to enroll in an associated laboratory course (Physics 155L). Three 50-minute or two 80-minute class meetings and two 90-minute laboratory meetings per week. Evaluation based on homework, laboratory reports, and examinations.

Credits 4

Corequisites

Includes a required corequisite lab, Physics 155L.
